

## Technical Certificate – Child Development

---

The Technical Certificate for Child Development is a one-year certificate that provides the student with the knowledge and skills needed to work with young children and the families they serve. Students gain necessary knowledge about child growth and learning and get hands-on field experiences. Students also learn strategies that will help the childcare professional succeed in the daily routine and requirements of the work place. The technical certificate builds on the certificate of proficiency, and contains courses embedded in the Associate of Applied Science degree in Early Childhood Education. Students must earn a grade of “C” or above in each required course in order to receive a technical certificate from ANC.
