

Part Time Field Technician for Air Quality Monitoring Station - Flexible Work Hours

Montrose Air Quality Services LLC, an affiliate of the Montrose Environmental Group (website: www.montrose-env.com) seeks a **highly reliable** part time field technician for long-term, steady work (Approx. 8 Hrs./Wk.) to operate and maintain an ambient air quality monitoring station located at the Big River Steel facility in Osceola AR. **Work hours are flexible.** Responsibilities include sample collection and shipping, QC checks, calibrating and maintaining sophisticated air monitoring instruments. Local, on-site training and tools provided. Applicant must pass drug, alcohol and background checks, have good computer, electronic and writing skills, cell phone, email and reliable personal transportation. A science degree in electronics/instrumentation is preferred or equivalent work experience. Successful candidate must be highly reliable and attentive to detail. Competitive hourly pay (Min. \$20.00/Hr., including round trip travel time between your residence and the monitoring site). Mileage expenses are also reimbursed. To apply, please forward resume and professional references to: Dave Cummings at dcummings@montrose-env.com.
