

Emergency Medical Technician (EMT) - Certificate of Proficiency

The Emergency Medical Technician Program provides training to recognize, assess, and manage medical emergencies of acutely ill or injured patients in a pre-hospital care setting. Students are required to participate in a 48 hour clinical internship and 24 hour field internship. The course content covers anatomy and physiology, initial patient survey and triage, airway management, oxygen therapy, and treatment of bleeding, shock, cardiac arrest, fractures, spinal injuries and other medical emergencies. Additional areas of study include automated external defibrillation, multi-lumen airways and general pharmacology. The course is designed for anyone interested in working in public safety, including fire, police and ambulance operations. Students who successfully complete this program are eligible to take the National Registry Examination. Students must complete the course with a grade of "C" or above.
